Project Name	Smart Fashion Recommender Application
Team Members	M.Karthick Raja R.Hirthic Shyam A.Edwin Kirubakaran R.Muthu Karthick

Step 1:

Go the official Docker website:

<https://docs.docker.com/desktop/install/windows-install/>

The screenshot shows a web browser window displaying the Docker Desktop installation page for Windows. The browser's address bar shows the URL <https://docs.docker.com/desktop/install/windows-install/>. The page has a blue header with the Docker logo and navigation links: Home, Guides, Manuals, Reference, Samples, and Contribute. The main content area is titled "Install on Windows" and includes a "Docker Desktop terms" section with a note about commercial use. Below this is a "Welcome to Docker Desktop for Windows" message and a "Download Docker Desktop for Windows" button. The "System requirements" section lists "WSL 2 backend" and "Hyper-V backend and Windows containers". The right sidebar contains "Page details" (7 minute read), "Tags" (windows, install, download, run, docker, local, Docker Desktop), and a "Contents" table of contents.

Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

Step 3:

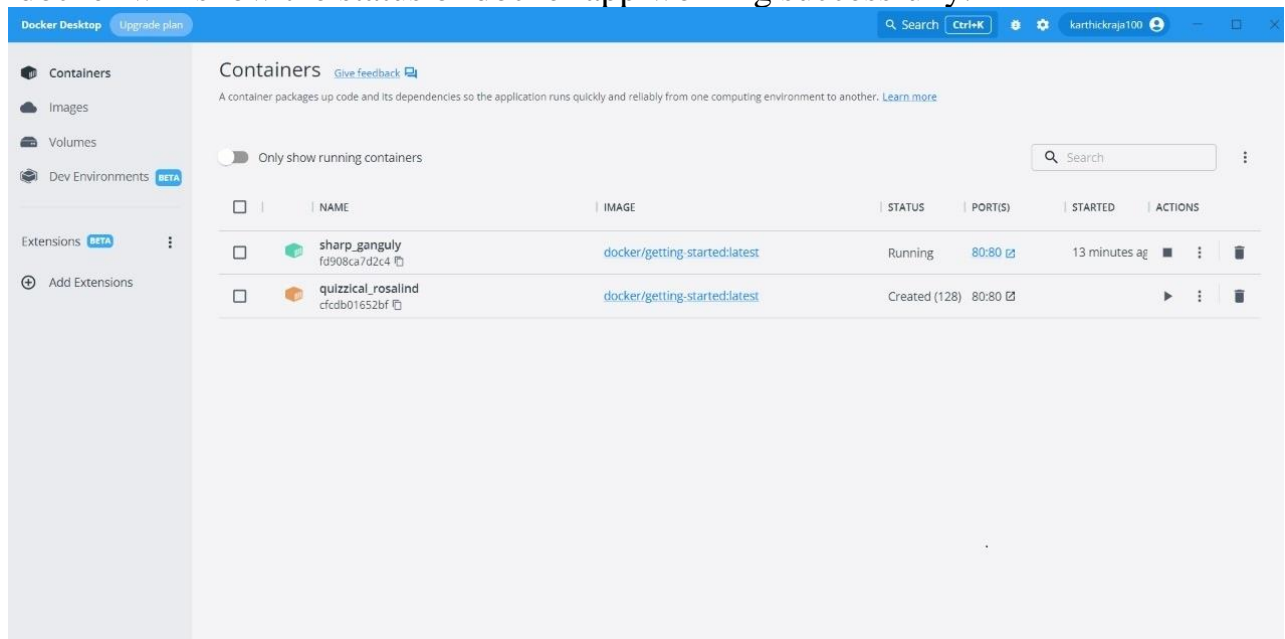

Go to downloads in browser (or) type **ctrl + J**, it will navigate to download page and double-click the particular docker file.

Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

Step 5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

Step 6:

Finally, the docker is installed successfully.
